

Laboratory Seed Blower 220-240V 50Hz 1ph

Code: [542-044/01](#)

Product Group: [Seed technology](#)

The Laboratory Seed Blower is a precision built laboratory machine designed to separate light and heavy fractions of a great variety of seeds. The blower is equipped with a synchronous motor to ensure uniform RPM and therefore consistent test results. Air flow is regulated with a calibrated vernier gate and adjusted with a calibrated hand wheel for precise adjustments that can be easily repeated. Large tube kit is standard with the seed blower.

Further Information

Includes timer, separation pipe and fan with regulator.
